

Asset Management Solution

The Complete Solution for Asset Managers

Your asset valuation, disposition and remarketing jobs are complex and can be time consuming, error prone and expensive.

To be your best, you need a complete asset management solution that gives you speedy processes, operational fluidity and effective organizational communication.

Our Asset Management Solution provides a single, end-to-end software solution to manage all asset management operations.

Collaborative
Everyone works inside a single solution

Flexible
Configurable workflows, which scale as the business grows

Efficient
Eliminate spreadsheets and mitigate the risk of human error

Complete
End-to-end solution tracks all aspects of the asset life cycle

Profitability

Easily see and measure employee throughput speed and deal profitability in whatever level of detail desired

Security

Permissions to enter, change or review data are managed via authentication and role-based privileges

Accuracy

Gain an edge on your competition by leveraging a centralized data store to more-accurately determine residuals

Business Intelligence

Centralized data store provides auditable processes and details of all asset management activity

Compliance

Internal controls for approval authority and compliance with regulatory policies are enforced

Integrations

Integrate multiple functionalities into a common tool used across the organization

OUR ASSET MANAGEMENT SOLUTION HAS THREE MODULES

Asset Valuation Module – AVM

With AVM you can create and manage the asset valuations used by sales, pricing and credit personnel, and others.

Discover how easily your team can create and access real-time asset valuation information for sales, and when processing mid-term changes, buy-outs, credit memos and portfolio risk reviews.

Asset Disposition Module – ADM

ADM tracks mid-term and end-of-term disposition information for assets – whether returned, purchased, renewed or renegotiated.

You have multiple scenarios to consider as end-of-lease approaches. ADM's workflow gives you powerful tracking and data recording tools – preparing you for any scenario and driving real results.

Asset Remarketing Module – ARM

ARM makes your currently complex process of remarketing much easier – order and access completed inspection reports, track returned assets and assign the assets for resale.

Utilize built-in remarketing and reselling features, and calculate net profitability in a streamlined, unified system.

“With AMS, we can better track business requests, collaborate in real time, produce on-demand reports, manage KPI targets and streamline compliance procedures. It's hands down the complete asset management solution!”

Robert Mercogliano, Head of Asset Management, SunTrust Equipment Finance

Quick View

All data is stored in a central repository, enabling quick views into customer, industry, asset type and specific asset information

System of Record

Nightly feeds from your back-end accounting system facilitates and maintains current data within AMS

Workflow

Utilize logical and intuitive workflows that streamline valuation process and automatically notifies collaborators

Reporting

Data repository that generates faster and more-accurate reporting

Notifications

Automated emails are generated to task holders as workflow statuses change

Comparables

Pull up past appraisal and valuations to populate valuation grids with multiple curves
