ASSET MANAGEMENT SOLUTION

EARLY 2018

Are you maximizing your efficiency when managing your assets under lease?
Does your current asset management solution limit your flexibility, control over processes, and ability to collaborate effectively?

Collaborative. Flexible. Efficient.

A complete asset management solution brought to you by the makers of SuperTRUMP.

Asset managers have to keep track of a lot of moving pieces.

Your asset valuation, disposition and remarketing jobs are complex, and can be time consuming, error prone and expensive. Excellent customer service that drives above average bottom line performance can be elusive.

To be your best, you need a complete asset management solution that gives you speedy processes and effective organizational communication.

Use only what you need, when you need it.

Three modules – valuation, disposition and remarketing – manage your entire asset management process. The modules work in conjunction with one another as a complete system, or you can select disposition and/or remarketing at your option.

The smart choice for asset managers.

Leverage collaborative, end-to-end workflow and comprehensive, robust reports to more effectively communicate within your organization, increase accuracy, streamline processes and reduce costs.

New from Ivory Consulting!

Asset Valuation Module (AVM)

The centerpiece of the asset management system. With AVM you can create and manage the asset valuations used by sales, pricing and credit personnel, and others.

Discover how easily your team can create and access real-time asset valuation information for sales, and when processing mid-term changes, buy-outs, credit memos and portfolio risk reviews.

Asset Disposition Module (ADM)

ADM tracks mid-term and end-of-term disposition information for assets – whether returned, purchased, renewed or renegotiated.

You have multiple scenarios to consider as end of lease approaches. ADM's workflow gives you powerful tracking and data recording tools – preparing you for any scenario and driving real results.

Asset Remarketing Module (ARM)

With ARM's collaborative platform, your cross-functional teams can effectively communicate and work efficiently to maximize results and improve productivity.

ARM makes your current complex process of remarketing much easier – order and access completed inspection reports, track returned assets, assign the asset for resale, utilize built-in remarketing and reselling features and calculate net profitability in a streamlined, unified system.

Sound interesting? Let's chat.
