

Pricing From Anywhere Made Easy

Why a hosted offering?

A SuperTRUMP hosted offering via Amazon Web Services™ (AWS) is a secure, cost-effective way to run SuperTRUMP. Choose from SuperTRUMP Web, SuperTRUMP for Salesforce or the SuperTRUMP Salesforce1 Mobile application, on a server hosted by AWS. The experts at Ivory and AWS maintain, update, backup, secure and provide support for your hosted solution so your IT department can focus attention on other important tasks.

Flexibility of Deployment

Our solution can reach any employee, on any supported device, in any location, over all networks. Your pricing deployment strategy no longer needs to be planned around technology.

Anytime-anywhere Access

With a SuperTRUMP hosted solution you have access to the application and data from any supported web browser and through the Salesforce1 mobile application on certain devices.

Cost Efficiency

Investing heavily in data centers and servers takes focus away from the customers and projects that differentiate your business. Allow Ivory to host your SuperTRUMP and free your valuable resources.

Customization and Consulting

We can customize your calculations, migrate data from your Excel spreadsheets and integrate SuperTRUMP into your global systems.

SuperTRUMP Hosted Environment Benefits

Keep Technology Updated

Let the experts at Ivory worry about updating your software and applying application patches.

Security, Reliability and Compliance

Get the advantage of secure, reliable, and scalable global computing with Ivory deploying SuperTRUMP via AWS.

Pricing From Anywhere Made Easy

Security Overview

Ivory's deployment of SuperTRUMP via world-class Amazon Web Services™ adopts an end-to-end strategy to secure and solidify its infrastructure, including physical, operational, and software measures.
